

# Index

## A

Adjusted  $R^2$ , 194  
Agglomeration schedule, 270  
Agglomerative clustering, 244  
Aggregation, 31  
Akaike's information criterion (AIC), 260, 279  
Alpha error. *See* Type I error  
Alpha-inflation, 136  
Alternative hypothesis, 117  
Ambiguous problems, 12  
Analysis of variance (ANOVA), 115, 136, 137  
ANOVA. *See* Analysis of variance  
Anti-image, 207  
Armstrong and Overton procedure, 38  
Autocorrelation, 173  
Average. *See* Mean  
Average linkage, 250

## B

Backward method, 169  
Balanced scale, 59  
Bar chart, 85, 104, 105  
Bartlett's test of sphericity, 207, 226  
Bayes Information Criterion (BIC), 260, 279  
Before-after design, 68  
Before-after experiment with a control group, 69  
Beta. *See* Regression models  
Beta error. *See* Type II error  
Between-group variation. *See* Analysis of variance  
Bivariate regression, 164  
Bonferroni correction, 144  
Brown and Forsythe's test, 139

## C

Cases, 26  
Causality, 17  
Causal research, 16

Census, 38  
Centroid method, 250  
Chaining effect, 252  
Chebychev distance, 246  
Chi-square test, 82, 115  
CIA-The World FactBook, 46  
City-block distance, 246  
Clearly defined problems, 13  
Cluster analysis, 237  
Cluster feature tree, 259  
Clustering algorithms, 250  
Clustering procedures, 238, 243  
Clustering variables, 238, 240, 247  
Clusters, 238  
Cluster sampling, 40  
Codebook (creating), 91  
Coding (data), 79  
Coefficient of determination. *See*  $R^2$   
Collinearity, 166, 242  
Common factor analysis, 211  
Communality, 208, 210  
Communicating the results, 285  
Company records (secondary data), 47  
Complete linkage, 250  
Components, 202  
Computer-assisted personal interview (CAPI), 54  
Computer-assisted telephone interview (CATI), 54  
Computer-assisted web interview (CAWI), 55  
Compute variable (SPSS), 99  
Confirmatory factor analysis, 202, 218  
Constants, 26. *See also* Regression models  
Constructs, 26, 90, 219  
Construct validity, 36  
Consulting firms (secondary data), 49  
Content validity, 36  
Convenience sampling, 41  
Correlation, 87

Correlation and causation, 17  
 Correlation matrix, 207, 225  
 Covariance-based structural equation modeling, 222  
 Criterion validity, 36, 241, 260  
 Critical value, 115  
 Cronbach's Alpha, 220, 232  
 Crosstab, 87, 108

## D

Dependent variables, 32, 67  
 Degrees of freedom, 127  
 Dendrogram, 253, 271  
 Dependent observations, 31  
 Descriptive research, 15  
 Direct oblimin rotation, 215  
 Distance matrix, 245  
 Divisive clustering, 244  
 Dummies, 90  
 Durbin-Watson test, 173

## E

Effect size, 145  
 Eigenvalue, 210, 226  
 Elbow criterion  
   in cluster analysis, 254  
   in factor analysis, 213, 228  
 Enter method, 169  
 Equidistance, 33, 207  
 Error (regression), 163  
 ESOMAR, 66  
 Ethics, 299  
 Ethnography, 15, 72  
 Euclidean distance, 245  
 Eurostat, 48  
 Existing research studies (secondary data), 47  
 Experiments, 19, 67  
 Expert validity, 36, 260  
 Exploratory factor analysis, 219  
 Exploratory research, 13  
 Extraneous variables, 67

## F

Facebook, 50  
 Face-to-face interviews, 54  
 Face validity, 36, 260  
 Factor-cluster segmentation, 242, 266  
 Factor, 67, 204  
 Factor analysis, 220  
 Factor loadings, 209, 213, 228  
 Factor rotation, 214, 227, 228  
 Factor scores, 215, 231  
 Familywise error rate, 136, 144  
 F-distribution, 143

Field experiments, 19  
 Field service, 7  
 Focus groups, 14, 71  
 Formative constructs, 28  
 Forward method, 169  
 Frequency table, 84  
 F-test (regression analysis), 180  
 F-test of sample variance. *See* Levene's test  
 Full factorial design, 67  
 Full service providers, 6  
 Furthest neighbor, 250

## G

Games-Howell procedure, 145, 157  
 Google (searching via), 51  
 Governments (secondary data), 48

## H

Heteroskedasticity, 172  
 Hierarchical clustering, 244, 267  
 Histogram, 84  
 Hochberg's GT2, 145  
 Homoskedasticity, 172  
 Hypothesis, 15, 114, 117  
 Hypothesis testing, 114

## I

Icicle diagram, 267  
 Imputation, 82  
 Independent samples t-test, 131, 151  
 Independent variables, 32, 67  
 Interaction effects, 147  
 Intercept. *See* Regression model  
 Internal consistency reliability, 37, 220  
 Inter-rater reliability, 37  
 Interval scale, 33  
 Interviews, 70  
 Item non-response, 81  
 Items, 26

## J

Jaccard coefficient, 249  
 Judgmental sampling, 40

## K

Kaiser criterion, 213, 227, 228  
 Kaiser-Meyer-Olkin (KMO) criterion, 207, 226  
 k-means, 255  
 Kolmogorov-Smirnov test, 119

## L

Lab experiments, 19  
 Laddering, 71  
 Latent variables, 207

Levels, 67  
 Levene's test, 132, 139  
 Likert scale, 58  
 Limited service providers (Market research), 6  
 Line chart, 85, 104  
 LISREL, 221  
 (Literature) databases (Secondary data), 49  
 Literature search, 15  
 Log transformation. *See* Transforming data

## M

Mail surveys, 45, 56, 64  
 Main effects, 146  
 Mall intercept, 41  
 Marketing opportunity, 12  
 Marketing problem, 12  
 Marketing research (AMA definition), 3  
 Marketing symptom, 12  
 Market research (ESOMAR definition), 3  
 Market segmentation, 16, 237  
 Matching coefficients, 248  
 McNemar test, 121  
 Mean, 85, 106  
 Means-end (chain), 71  
 Mean substitution. *See* Imputation  
 Measurement error, 34  
 Measurement model, 219  
 Measurement scales, 15  
 Measurement scaling, 32  
 Measure of sampling adequacy (MSA),  
     207, 227  
 Median, 85, 106  
 Metric scales, 33  
 Micro-marketing, 239  
 Minto principle, 298  
 Missing values, 95  
 Mixed-mode surveys, 56  
 Mobile phone interviewing, 55  
 Mode, 85, 106  
 Multicollinearity, 166  
 Multi items, 28  
 Multiple regression, 164  
 Mystery shopping, 72

## N

Nearest neighbor, 250  
 Negative autocorrelation, 174  
 Nominal scales, 33  
 Nonparametric test, 115  
 Non-response, 42, 64  
 Normality tests, 120  
 Null hypothesis, 121

## O

Oblique factor rotation, 215  
 Observational studies, 14, 72  
 Observations, 26  
 Omega-squared, 145  
 One-sample t-test, 115, 124  
 One-shot case study, 68  
 One-tailed test, 118  
 One-to-one marketing, 239  
 One-way ANOVA. *See* Analysis of variance  
 Operationalization, 26  
 Oral presentation, 296  
 Ordinal scales, 33  
 Ordinary least squares (OLS), 170  
 Orthogonal factor rotation, 214  
 Outliers, 88, 175

## P

Paired samples t-test, 134  
 Parametric test, 115, 119  
 Parsimonious models, 179  
 Partial least squares (PLS), 221  
 Path diagram, 219  
 Personal interviews, 14, 54  
 Pie chart, 84, 103  
 Pooled variance estimate, 132  
 Population, 37  
 Post hoc tests, 144  
 Post-test only control group experiment, 68  
 Power analyses, 123  
 Power of a statistical test, 123  
 Predictive validity, 36  
 Pretesting (questionnaires), 65  
 Primary data, 29, 52  
 Principal axis factoring, 202, 211  
 Principal components analysis, 202  
 Principal factor analysis, 211  
 PRIZM, 16, 262  
 Profiling, 260  
 Projective techniques, 73  
 Projective tests, 14  
 p-value, 129

## Q

Qualitative data, 30  
 Qualitative research, 21  
 Quantitative data, 30  
 Quantitative research, 21  
 Quantitative scales, 33  
 Questionnaires, 52  
 Quota sampling, 41

**R**

$R^2$ , 177  
 Random error in measurement, 34  
 Range, 86  
 Rank order scales, 60  
 Recode variable (SPSS), 100  
 Reflective constructs, 28  
 Regression analysis, 180  
 Regression model, 162  
 Reliability, 34, 36  
 Reliability analysis, 220, 232  
 Representative samples, 37, 38  
 Research design, 13  
 Research report, 285  
 Residual. *See* Error (regression)  
 Residuals in factor analysis, 216, 230  
 Results communication, 285  
 Russel and Rao coefficient, 249  
 Ryan/Einot-Gabriel/Welsch Q procedure, 144, 156

**S**

Sales reports (Secondary data), 47  
 Sample sizes, 41  
 Sampling, 37  
 Sampling frame, 39  
 Sampling frame error, 39  
 Scale development, 26  
 Scales, 32  
 Scanner data, 16  
 Scatter plot, 87, 106  
 Scree plot  
   in cluster analysis, 254, 271  
   in factor analysis, 213, 228  
 Search engines, 50  
 Secondary data, 29, 46  
 Segmentation, 16, 237  
 Segments, 16, 237  
 Segment specialists (Market research), 6  
 Select cases (SPSS), 97  
 Semantic differential scale, 59  
 Separate variance estimate, 132  
 Shapiro-Wilk test, 119, 150, 177  
 Significance level, 121  
 Silhouette measure of cohesion  
   and separation, 280  
 Simple matching coefficient, 248  
 Simple random sampling, 39  
 Single items, 28  
 Single linkage, 250, 252, 267  
 Snowball sampling, 41  
 Social networking sites (Secondary data), 50  
 Specialized firms (Market research), 7  
 Split files (SPSS), 92, 97

Split-half reliability, 220  
 Split-sample validation, 183  
 SPSS Statistics Data Editor, 94  
 SPSS Statistics Viewer, 94  
 SPSS syntax, 96  
 Stability  
   of the cluster solution, 260  
   of measurements, 36  
   of the regression model, 183  
 Standard deviation, 86  
 Standard error, 125  
 Standardizing variables, 89  
 Statistical power, 123  
 Statistical significance, 114  
 Stepwise method (regression), 169  
 Stimulus, 19, 67  
 Stratified sampling, 40  
 Structural equation modeling, 202, 221  
 Sum of squares, 170  
 Survey non-response, 81  
 Systematic error in measurement, 34  
 Systematic sampling, 40  
 Systematic variation (test statistic), 126

**T**

t-distribution, 126  
 Telephone interviewing, 54  
 Test markets, 19, 73  
 Test-retest reliability, 36, 220  
 Test statistic, 124  
 Tolerance, 166  
 Trade associations (Secondary data), 49  
 Transforming data, 89  
 Treatments, 67  
 t-test, 131  
 Tukey's HSD, 144  
 Twitter, 50  
 Two independent samples t-test, 131  
 Two-samples t-tests, 115  
 Two-staged least squares (2SLS), 170  
 Two-step clustering, 259, 278  
 Two-tailed test, 119  
 Two-way ANOVA, 146. *See also* Analysis  
   of variance  
 Type I error, 121  
 Type II error, 121

**U**

Unsystematic variation (test statistic), 126

**V**

Validation  
   of the cluster solution, 260  
   of regression models, 182

Validity, 34  
Value labels option (SPSS), 97  
Variables, 26  
Variance, 86  
Variance inflation factor (VIF), 166  
Variance ratio criterion, 255, 259  
Varimax rotation, 215, 229  
Visual aids, 298

**W**

Ward's method, 252  
Web surveys, 55

Weighted least squares (WLS), 170  
Welch's test, 139  
Wilcoxon signed rank test, 121  
Within-group variation. *See* Analysis of  
variance  
Workflow (of data), 77  
Written report, 288

**Z**

z-test, 127  
z-transformation, 89, 105
